Our Neurodiagnostic Technology programs teach students to record electrical activity in the central nervous, autonomic and peripheral nervous systems used in the diagnosis and treatment of brain diseases. Instruction is provided in a hybrid format which includes online coursework and face-to-face clinical and laboratory experiences. Our programs prepare graduates for clinical roles in Electroencephalography (EEG), Nerve Condition Studies (NCS), Evoked Potentials (EP), and Polysomnography (PSG). A three –semester certificate or five-semester associate of applied science degree is available.
