## **Core Privileges**

Evaluate, diagnose, and provide primary mental healthcare and treatment using a variety of therapeutic and interpersonal techniques for patients within the age group of patients seen by the sponsoring physician(s) who are at risk for developing or presently have psychiatric disorders. The Allied Health Professional may not admit patients to the hospital.

NOTE: Psychiatry Core Privileges include: Assess and treat individual patients with disease states and non-disease-based etiologies using advanced theoretical and empirical knowledge of physiology, pathophysiology, and pharmacology, including determination of Axis I-V psychiatric diagnoses based on assessments, utilizing the most recent edition Diagnostic and Statistical Manual of Mental Disorders; clinically manage psychiatric disorders including but not limited to severe and persistent neurobiological disorders; complete comprehensive assessments, develop differential diagnoses, and formulate and implement treatment plans; conduct behavioral healthcare maintenance of the population served; conduct individual, group, and family psychotherapy; direct care as specified by medical staff-approved protocols; evaluate and manage psychobiological interventions; initiate referral to appropriate physician or other healthcare professional of problems that exceed the Allied Health Professionals scope of practice; make daily rounds on hospitalized patients with or at the direction of the collaborating/supervising physician; monitor and manage populations of patients with disease states and non-disease-based etiologies to improve and promote healthcare outcomes; obtain social and psychological admission history; utilize advanced practice skills to independently provide case management, including psychiatric rehabilitation and home care; and teaching, promotion, and prevention; obtain and record medical history and perform physician examinations; order diagnostic testing such as laboratory tests, X-rays, EKG, EEG, and CT scans, and order therapeutic modalities, including the prescribing as indicated of any medication which is FDA approved for, or routinely used for, treatment of side effects of medications used to treat Axis I or II psychiatric diagnoses; the prescribing as indicated of any medication used for treatment of an Axis I or II diagnosis when that medication does not have an FDA approved indication for that disor

been prescribed by another health care provider in order not to interrupt or prolong the interruption of a medication that is essential for the health and safety of the patient; and 2) initiation of medication treatment for an emergent or urgent medical condition until the patient can obtain appropriate non-psychiatric medical services; such prescriptions or orders of non-psychotropic medications will be limited to those amounts estimated to be necessary to allow the patient time to obtain appropriate non-psychiatric medical services and such use is to be reviewed during supervision with the primary supervising physician required as part of the Quality Improvement Process and perform an in person face-to-face evaluation for restraint use for violent or self-destructive behavior.
