

Center for Outcomes Research and Evaluation Internship Program

CORE Internship Program Objective: To foster professional research skills and inspire students to become tomorrow's leaders in health care innovation

CORE Internship Program Description

The CORE Internship Program seeks students interested in careers in the field of health outcomes research to work at the Center for Outcomes Research and Evaluation (CORE) at Atrium Health. Interns will collaborate with their assigned mentor on ongoing research studies with near-term impact on patient care. Interns are expected to be independent, highly motivated and able to work collaboratively. Interns will have the opportunity to network with members of the CORE team and other interns in their cohort via meetings, organized training opportunities, journal club presentations, and various other activities. A final presentation of project results will complete the internship.

Student Selection Criteria and Process

Candidates pursuing a Masters, PhD, or medical degree at an accredited program are preferred. Consideration will also be given to exceptional undergraduate students with expressed interest in a health research career. Candidates must be eligible to work in the US.

Acceptance into the program is contingent upon academic excellence and preference is given to those with prior experience and/or training in research. The Selection Committee will review applications and match top students with a mentor. Students must complete an interview prior to a formal offer.

2020 Summer Intern Application and Program Details

Applications for the Summer 2020 program will be accepted November 2019 through February 14, 2020. Complete applications will include a **cover letter** describing research interests and experiences, an updated **CV**, **transcripts** and the names and contact information of three academic or research-oriented **references**. Interested candidates should email all application documents as one combined file (with applicant's name in the filename) to program contacts listed below. Selected interns will start this 10-week paid internship program late-May 2020 and will be expected to contribute at least 20 hours of effort per week.
