

Narcotic Policy for New Patients

New patients will NOT receive a narcotic prescription (ex. pain medication, Xanax[®], etc.) on the initial visit.

Before a narcotic prescription is issued the following criteria must be met:

- Pageland Family Medicine must receive records from previous providers
- A narcotic agreement must be signed
- A drug screen must be completed upon doctor's request

After a narcotic prescription is written for the patient, he/she will be subject to:

- Random pill counts
- Random drug screen test upon doctor's request

I have read the above policy and agree to follow the policy if narcotics are issued to me.
