

Academic Learning Health System “Preventions for Promoting Health” (aLHS-Pre) Program

The NIH-funded aLHS-Pre program offers one year of full-time predoctoral training to help clinical scholars develop research skills for health systems. Scholars will learn how to apply their research findings to practice. The program includes a stipend, research time, and full tuition for an MS in Translational and Health System Science, with support from a multidisciplinary mentoring team. Graduates of this program will be well-equipped for careers in academic research, healthcare administration, policy development, or industry roles focused on improving health system outcomes.

T32 awardees will receive:

- ✓ Stipend support awarded at the NIH allowed annual maximum, and tuition and fee award.
- ✓ Travel funds to attend national scientific meetings.
- ✓ Institutional allowance for training-related expenses.
- ✓ Access to CTSI professional services.

Program Leaders:

Janet Tooze, Ph.D.
Professor, Biostatistics and Data Science
jtooze@wakehealth.edu

Alain Bertoni, MD, MPH
Professor, Public Health Sciences
abertoni@wakehealth.edu
