

Monday, October 13,
12 to 1 p.m.
525@Vine Room 4001

Kathrin
Rothermich, PhD

LUNCH AND LEARN

*Bridging Language and Age Differences in
Health Care: The Role of Communication
Accommodation and Adaptation*

The Maya Angelou Research Center for Healthy Communities, Claude Pepper Older Americans Independence Center, and the Department of Implementation Science's Community-Engaged Implementation Science Lab are co-sponsoring a lunch and learn with Kathrin Rothermich, PhD, Associate Professor of Communication Sciences and Disorders, East Carolina University.

Please join us for lunch, which will be provided.

Dr. Rothermich will discuss innovations in communication research about the promise and risks of communication accommodation for health care services for older adults (e.g., "elderspeak") and people whose first language is not English.

Dr. Rothermich leads an NSF-funded project evaluating communication accommodation using mixed-reality experiments.
