

Carolinas Medical Center-Lincoln

Carolinas Medical Center-Lincoln has been the healthcare leader in Lincoln County, North Carolina since 1969. At CMC-Lincoln, you have access to the latest in technology, advanced treatments and quality care provided by our highly specialized physicians and staff. With 101 licensed beds, the hospital has steadily enhanced its services to meet the needs of a growing community. The campus also includes a medical office building that houses surgical, orthopaedic, cardiology, urology and OB/GYN practices, as well as classrooms for community educational programs.

The new CMC-Lincoln, which opened to the public in 2010, has a complete range of services and specialized treatments that provide local residents convenience for their healthcare needs. Our high-tech MRI produces high quality images and offers many advantages including the ability to accommodate most people. New Beginnings birth center includes a special care nursery with four Level II nursery beds and 10 private LDRP (labor, delivery, recovery and post-partum) rooms. Additional patient service areas include 77 medical/surgical patient rooms; 24 Emergency Department examination rooms and two trauma rooms; 10 critical care unit beds; and four operating rooms. Each patient room is equipped with flat-panel televisions, wireless internet access and extended-stay furnishings for the comfort of family members.

In addition, the hospital includes an on-site laboratory, radiology, imaging, pharmacy, physical therapy services, and a full-service cafeteria featuring healthy menu options. It also has a helipad for patients whose conditions require rapid transport to a higher level facility. The hospital's sister facility in Charlotte, Carolinas Medical Center, has the region's only Level I Trauma Center along with specialty centers that provide advanced care in heart, cancer, neurology, orthopaedics, pediatrics and other specialties.

Our uncompromising excellence and commitment to care give patients more of everything. It's who we are at Carolinas Medical Center-Lincoln.
