

*Provider  
Canopy Course  
Descriptions*

## CANOPY

### New Provider Training

Training for new providers and Advanced Care Providers (ACPs) is designed to meet the training needs for the venue where the provider will be practicing and using Canopy. The courses are set up for the provider who will use Canopy in:

1. The acute (hospital) setting only
2. The ambulatory (clinic) setting only
3. Both acute and ambulatory settings

In addition to completing the appropriate eLearning course appropriate for the venue, the provider will also complete Instructor Lead Training (ILT) and production setup.

### CANPY-ACT – Formerly ENPAA1/ENPAAB

This online course provides scenario based training for providers using Canopy in Acute facilities and concludes with a preview of PowerChart Touch, CHS' suite of solutions to access records when treating patients anywhere, at any time.

This course provides instruction on accessing the patient's Electronic Medical Record (EMR) to view data and to document information in the EMR. You will learn how to access the workflow view, enter orders using power plans and choosing individual orders. This course provides introduction to the Dragon Dictation System.

- **Audience:** New providers and ACPs who will use Canopy in the acute setting.
- **Pre-requisite:** None
- **Objectives:** After completing this course, you will be able to:
  - View results and other patient information from the Message Center
  - Access the EMR to review allergies, home medications and other data
  - Add allergies and/or home medications
  - Perform medication reconciliation for admission and transfer
  - Enter orders from power plans, the Ad Hoc ordering page, or individual/single orders
  - Modify, suspend and cancel orders

- Identify diagnosis and update the problem list
- Review Lab and Radiology Results
- Review and update history and procedure information
- Access and use PowerNote templates and /or Dragon to create notes
- Complete depart process steps, including discharge medication reconciliation

### CANPY-AMB – Formerly ENPAM1/ENPAM2

This online course provides scenario based training for providers using Canopy in Ambulatory facilities and concludes with a preview of PowerChart Touch, CHS' suite of solutions to access records when treating patients anywhere, at any time.

This course provides instruction on accessing the patient's ambulatory EMR. You will learn how to view data and to document in the ambulatory EMR. This course provides introduction to the Dragon Dictation System.

- **Audience:** New providers and ACPs who will use Canopy in the ambulatory setting.
- **Pre-requisite:** None
- **Objectives:** After completing this course, you will be able to:
  - Access the ambulatory EMR to review allergies, home medications and other data
  - Add allergies and/or home medications
  - Identify diagnosis and update the problem list
  - Review and address health maintenance alerts
  - Enter orders using the Quick Orders page (QOP)
  - Modify and cancel orders
  - Access Dragon to perform dictation
  - Review and update history and procedure information
  - Access and use PowerNote templates and /or Dragon to create notes
  - Create and save pre-completed notes
  - Send prescriptions electronically (escribe)
  - Complete ambulatory depart process steps
  - View results, messages and other patient information from the Message Center

## CANPY-HYB – Formerly ENPAA2

This online course provides scenario based training for providers using Canopy in both Acute and Ambulatory settings. It concludes with a preview of PowerChart Touch, CHS' suite of solutions to access records when treating patients anywhere, at any time.

This course provides instruction on accessing the patient's Electronic Medical Record (EMR) to view data and to document information in the EMR. You will learn how to access the workflow view, enter orders using power plans and choosing individual orders. This course also provides instruction on accessing the patient's ambulatory EMR. You will learn how to view data and to document in the ambulatory EMR. This course provides introduction to the Dragon Dictation System.

- **Audience:** New physicians and ACPs who will use Canopy in the acute setting and a CHS Ambulatory setting.
- **Pre-requisite:** None
- **Objectives:** After completing this course, you will be able to:
  - View results and other patient information from the Message Center
  - Access the EMR to review allergies, home medications and other data
  - Add allergies and/or home medications
  - Perform medication reconciliation for admission and transfer
  - Enter orders from power plans, the Ad Hoc ordering page, or individual/single orders
  - Modify, suspend and cancel orders
  - Identify diagnosis and update the problem list
  - Review Lab and Radiology Results
  - Review and update history and procedure information
  - Access and use PowerNote templates and /or Dragon to create notes
  - Complete depart process steps, including discharge medication reconciliation
  - Review and address health maintenance alerts
  - Review the patient's Immunization Schedule
  - Enter orders in the ambulatory setting using the QOP
  - Complete ambulatory depart process steps

## ENPILT

This instructor led course will provide a review of the online course and comprehensive assessment utilizing a Day in The Life scenario based on the providers specialty.

- **Audience:** New physicians and ACPs who will use Canopy.
- **Pre-requisite:** Appropriate online course for the venue where the provider will be using Canopy.

## ENPSET

This course provides instruction on basic production set up to prepare the provider for accessing the patient's EMR and documenting patient care.

- **Audience:** New physicians and ACPs who will use Canopy.
- **Pre-requisite:** Appropriate online course for the venue where the provider will be using Canopy.
- **Objectives:** After completing this course, you will be able to:
  - Access the production environment to set up document filters, order favorites, pre-completed notes and save favorite note templates to document patient care in the Acute setting
  - Customize summary/workflow pages
  - Add custom toolbar links

## E-ANES

This course provides instruction on how to access the patient's EMR to place pre-operative and post-operative orders. You will also learn how to document anesthesia care during the intra-operative procedure. This course provides introduction to the Dragon Dictation System and how to use it during note creation.

- **Audience:** New CRNA's and anesthesiologists who will use Canopy in the acute setting.
- **Pre-requisite:** None
- **Objectives:** After completing this course, you will be able to:
  - Access and review patient data, including lab and radiology results
  - Enter orders appropriate for the operative patient
  - Document care provided using PowerNote templates and/or Dragon Dictation
  - Overview of SaAnesthesia
  - Use macros to create a "To Do" list
  - Document intraoperative medications
  - Finalize the electronic anesthesia record
  - View cases remotely

## E-FNP

This course provides instruction how to access the patient's EMR from the tracking board. You will also learn how to view data, enter orders and document patient care. This course provides introduction to the Dragon Dictation System and how to use it during note creation.

- **Audience:** New providers and ACPs who will use Canopy in the ED.
- **Pre-requisite:** none
- **Objectives:** After completing this course, you will be able to:
  - Access the EMR from the FirstNet tracking board
  - View results and other patient information from the Message Center
  - View allergies and home medications using the ED Specialty Workflow

## CHS Training Center

---

- Enter orders from power plans, the 90% ordering page, or individual/single orders
- Modify and cancel orders
- Access and use PowerNote templates and /or Dragon to create notes

## E-STU

This course provides instruction on how to access the patient's EMR in an inpatient or ambulatory setting. You will learn how to view data, enter orders and to document patient care. This course provides introduction to the Dragon Dictation System

- **Audience:** Medical and ACP students who will use Canopy in the acute and/or ambulatory setting.
- **Pre-requisite:** none
- **Objectives:** After completing this course, you will be able to:
  - View results and other patient information from the Message Center
  - Access the EMR to review allergies, home medications and other data
  - Add allergies and/or home medications
  - Understand medication reconciliation for admission, transfer and discharge
  - Enter orders from Power Plans, the Ad Hoc ordering page, or individual/single orders
  - Access and use PowerNote templates and /or Dragon to create notes
  - Understand the workflow for the ambulatory setting
