

Carolinas Rehabilitation-Mount Holly

Founded in 1950, Carolinas Rehabilitation is one of the largest not-for-profit, academic rehabilitation centers in the nation. Inpatient beds are available at several facilities including the main location next to Carolinas Medical Center, Carolinas Medical Center-Mercy, Carolinas Rehabilitation-Mount Holly, Stanly Regional Medical Center and Levine Children's Hospital. Carolinas HealthCare System manages a total of 192 rehabilitation beds, making it the largest provider of rehabilitation services in the entire Southeast. Opened in 2007, Carolinas Rehabilitation-Mount Holly is a free-standing 40-bed hospital with all private rooms.

At Carolinas Rehabilitation, our team provides comprehensive, specialized care for spinal cord injury, brain injury, stroke, cancer and other traumatic and non-traumatic injuries and diseases. Carolinas Rehabilitation is also a training center for physiatrists who specialize in physical medicine and rehabilitation. Our goal is to restore quality of life. We are proud of our track record. And when our results are measured against similar hospitals, few can match our results in helping patients return home.

We are proud to be accredited by The Joint Commission and have all 16 of our programs accredited by the Commission on Accreditation of Rehabilitation Facilities. Carolinas Rehabilitation is the only rehabilitation hospital in the nation to be awarded the Top Performer Award by Professional Research Consultants for overall patient satisfaction. We are one of only 16 Traumatic Brain Injury Model Systems in the nation and have been for over 10 years. Our uncompromising excellence and commitment to care give patients more of everything. There is a difference at Carolinas Rehabilitation.
