PEDIATRIC SPINE

Pediatric & Adolescent
SPINE PROGRAM
at Levine Children's Hospital

Levine Children's Hospital offers a comprehensive program featuring multidisciplinary evaluation and management of spinal deformities in children.

Carolina's HealthCare System
Levine Children's Hospital

Pediatric and Adolescent Spine Program

Our pediatric orthopedic surgeons work in tandem with a multidisciplinary team of medical and surgical specialists including cardiology, pulmonology, neurology, neurosurgery and rehabilitation to provide patients with a full spectrum of care for even the most complex cases.

Named a Best Children's Hospital for orthopedics and neurology & neurosurgery by *U.S. News & World Report*, Levine Children's Hospital cares for spine patients from pre-op to recovery, all in a warm, child-friendly environment. Levine Children's Hospital's spine team specializes in operative and nonoperative techniques for the management of spine-related conditions.

SERVICES AND CONDITIONS TREATED
