

Atrium Health Levine Children's –Vaccine Statement

Dear valued patients and families,

We firmly believe in the effectiveness of vaccines to prevent serious illness and to save lives. We firmly believe in the safety of our vaccines. We firmly believe that all children and young adults should receive all of the recommended vaccines according to the schedule published by the Centers for Disease Control and the American Academy of Pediatrics.

We firmly believe, based on all available literature, evidence and current studies, that vaccines do not cause autism or other developmental disabilities. We firmly believe that vaccinating children and young adults may be the single most important health-promoting intervention we can perform as health care providers, and that you can perform as parents/caregivers.

We want to emphasize the important of vaccinating your child. We recognize that the choice may be a very emotional one, and, for some parents, even controversial. We will do everything we can to convince you that vaccinating according to the schedule is the right thing to do. **However, should you have doubts, please discuss these with your healthcare provider in advance of your visit. Please be advised that delaying or “breaking up vaccines” to give one or two at a time over two or more visits goes against expert recommendations and can put your child at risk for serious illness (or even death) and goes against our medical advice as providers at Atrium Health Levine Children's.**

As medical professionals, we feel very strongly that vaccinating children on schedule with currently available vaccines is absolutely the right thing to do for all children and young adults. Please recognize that by not vaccinating you are putting your child at unnecessary risk for life-threatening illness, disability, and even death.

Thank you for your time in reviewing this information, and please feel free to discuss any questions or concerns you may have about vaccines with any one of us.

Sincerely,
Your HealthCare Partners at
Atrium Health Levine Children's

Atrium Health
Levine Children's
Older Child Vaccine Statement

Dear valued patients and families,

We firmly believe in the effectiveness of vaccines to prevent serious illness and to save lives. We firmly believe in the safety of our vaccines. We firmly believe that vaccinating children and young adults may be the single more important health-promoting intervention we perform as health care providers and parents/caregivers.

Vaccines are so effective at preventing illness that many parents have never seen a child with bacterial meningitis or chicken pox or known a friend or family member whose child died of one of these diseases. Unfortunately, such success at preventing disease can make us complacent about vaccinating. But such an attitude, if it becomes widespread, can lead to tragic results and the re-emergence of preventable diseases.

In the pre-adolescent years, ages 10-12, it is recommended by the medical community and schools to give booster doses of varicella vaccine (if not done earlier), Tdap (pertussis and tetanus) and an initial booster dose of MCV4 (meningococcal meningitis). In addition, it is recommended, but not required, to initiate and complete the HPV vaccine series (human papillomavirus) between the ages of 9 and 26.

For new patients who are not vaccinated or incompletely vaccinated, we expect them to catch up on their complete vaccine series within the recommended time period of 12 months. By not vaccinating your child and boosting them in their pre-adolescent years, parents are putting their child and other children at unnecessary risk for life threatening illness, disability and even death as these diseases – varicella, meningococcal meningitis and pertussis – do occur each year in unvaccinated and under-vaccinated older children.

As medical professionals, we feel very strongly that vaccinating children and adolescents on schedule with current available vaccines is absolutely the right thing to do for all children and teens. If you do not comply with the required childhood and adolescent vaccines, we will request that you find another health care provider. Thank you for your time in reviewing this information and please feel free to discuss any questions or concerns you may have about vaccines with your provider.

Sincerely,

Your HealthCare Partners at
Atrium Health Levine Children's

Please know that there is a range of acceptable ages for each vaccine and so your individual practice schedule may vary slightly.

Dear Valued Patient/Parent,

Thank you for choosing Atrium Health Levine Children's for your child's healthcare needs. We practice comprehensive medical care focused on prevention as well as evaluation and management of your child's complaints and concerns.

Insurance companies are now dictating how physicians bill for these services. There are **two** definitions that you need to be aware of that define office visits:

1. Preventative or "Well Child" Exam

This visit is designed to review your child's growth and development. This visit is not designed to address specific complaints or to manage known medical problems. This is usually a visit to review preventative health issues such as:

- Growth and development
- Immunizations
- Physical Exam
- Activities of healthy living
- Patient Family History

2. Office Visit or "Sick Visit"

This visit is designed for the evaluation and management of a single or multiple complaints such as:

- Ear infections
- Allergies
- Chronic medical conditions that are flaring or require follow-up
- Respiratory infections
- Complex behavioral issues

During your child's preventative or "well child" exam today, other concerns/issues/forms/labs/vaccines may be addressed or performed that are not considered part of your preventative care benefits by your insurance carrier and could be considered an office visit. Please be aware that there is a possibility that these concerns/issues/forms/labs/vaccines will not be covered by your insurance carrier (depending on your individual insurance coverage) and could therefore be applied to your deductible/coinsurance. You may also be assigned responsibility by your insurance company for a sick visit co-pay/co-insurance, in addition to, one for the well visit.

Should you have additional questions regarding this information and/or the billing of your child's visit today, please contact your insurance company to ask questions specific to your coverage.

Thank you again for choosing Atrium Health Levine Children's.

Atrium Health Levine Children's- Billing and Insurance

Please bring your insurance card to every appointment. If your insurance changes at any time, please inform our staff at check-in.

You are responsible for all copays, deductibles, and services not covered by your insurance carrier. Payment is accepted via cash, checks, debit, credit or HSA card.

What insurances do you accept?

Atrium Health Levine Children's is willing to file with any type of insurance; however with the Affordable Care Act and usage of the Health Insurance Marketplace bringing so many new policies into effect, it is imperative that you check with your insurance company to determine if we are considered in-network with your policy.

If you have questions about the Marketplace, please visit www.healthcare.gov.

Unfortunately, at this time Tricare Prime*, BCBS NC Blue Value, United Healthcare Compass, and select SC Medicaid** plans are out of network.

*Unless referred to one of our providers.

**Absolute Total Care is considered in network for Rock Hill Pediatrics only.

Do I have to pay any charges up front?

We collect all copays at the time of service, and they vary between the many health insurance policies on the market. Please check your policy details to determine the deductibles, coinsurance and copayments you will owe for services rendered. If you have a plan where you must meet a deductible before services are covered in full, and have not met your deductible, we ask that you pay \$50 at the time of service. For our patients that are uninsured, we offer a 30% discount, and ask that you pay at least \$50 at the time of service.

Why am I getting a bill for services completed a while ago?

Once we have received a response from your insurance carrier, and if we confirm that there is a patient liability, we then bill you for the services. Also, insurance carriers sometimes require additional information which delays the processing of the claim.

Why wasn't my insurance carrier billed?

If the information in our billing system is inaccurate at the time of service, we will be unable to bill your insurance carrier. Please provide us with your correct health insurance information when you register with the office. If at any time your coverage changes, please inform us.

Why was my claim denied?

If you have active coverage and a claim is denied, contact your insurance carrier immediately for an explanation of how your claim was processed and why it was denied. Most of the time it is denied only because they need more information from the subscriber or there is an error with the spelling of the child's name or date of birth. Once your carrier has been contacted, you will have to ask them to reprocess the claim. To request to have a claim re-filed, please contact Customer Service at 704-512-7171.

Did my insurance carrier pay for services rendered?

Reimbursement from your insurance carrier will be reflected on your statement. Most carriers send an explanation of benefits notice explaining how the medical claim was processed.

- Information on what was paid
 - Any non-covered, deductible, or denied amounts
 - The balance owed by you
-

Why does my Medicaid card have my pediatric office on it?

A primary care provider must be listed on your child's card. If it does not say Charlotte Pediatric Clinic, we are unable to file it for your visit without prior authorization. To change the provider listed on your card, please call 704-353-1500.

Does my insurance carrier cover my child's prescriptions?

Contact your insurance carrier for information regarding coverage of prescriptions or consult your prescription benefits card.

Do I need to wait a full year between well child visits for insurance to cover them?

This depends completely on your policy. Some plans require you wait 365 days between well visits, while others will cover one per calendar or policy year, and some will only cover them every two years. The only way to find out is to contact your insurance carrier directly.

I just had a baby- what do I need to do?

Newborns are considered self-pay patients when first seen because their insurance is not yet active. You are only allowed 30 days after birth to add a child to your insurance policy, and we recommend that you call as soon as possible. Insurance carriers will not make exceptions, and the child will not be able to be insured until the next open enrollment if not done on time. When insurance does become active, it should retroactively cover any visits since birth.

You will receive a bill as a self-pay patient for doctor visits prior to your newborn's insurance becoming active and being entered into our system. As soon as you receive the insurance card with your newborn's information you can do one of two things:

1. Call the central business office at 704-512-7171. They will be able to enter your information and file any outstanding claims.
2. Bring your insurance card to your next appointment, as we require that you bring your card to each visit. We will scan your insurance card into our system and input the information, then file any previous claims. Please ask the registrar to have all previous claims filed.

If you have not yet received an insurance card for your newborn by the time you come in for your two month well visit, please contact the central business office to prevent outstanding claims from being turned over to collections. We also recommend that you follow up with your insurance carrier to find out the status of your policy if you have not received the insurance card within four weeks of adding your newborn.

Once the claims have been filed to your insurance company, you will then be billed only for copays and any coinsurance or deductibles that you are responsible for per your policy.

What happens if I am sent to collections?

Atrium Health utilizes the collection agency PMAB for delinquent accounts. You have 90 days from the day your insurance processes your claim to pay, or get set up on a payment plan, for any remaining amount deemed patient liability by your carrier. After 90 days, if no payment is received, and no arrangement made, the computer will automatically roll your account to collections. We are willing to work with you and your ability to pay. The business office can get you set up on a payment plan that fits your budget. If you have invoices due, or in collections, please contact us as soon as possible. We want to help! If you fail to contact us and have multiple invoices turned over to PMAB, it may result in dismissal from the practice.

Who do I contact with questions?

You can call the central business office customer service line Monday- Friday from 8a-5p at 704-512-7171. They have the ability to answer any questions regarding billing questions, even if your outstanding balance has been forwarded to PMAB.

Glossary of Insurance Terms

Benefit: The amount paid for covered medical services or events.

Claim: Your request to the insurance company for benefits. The claim is submitted to the insurance company for medical services you have received or events that make you eligible for payments.

Coinsurance: A percentage of your medical bill that is shared by you and your insurance company after your deductible has been met.

Copay: A predetermined fee that you pay for health care services in addition to what is covered by your insurance. Not every type of health insurance plan requires a copay.

Deductible: The predetermined amount of your medical bills that you pay before your insurance benefits begin.

Network: A group comprised of participating doctors, hospitals, and facilities. Depending upon your type of health insurance, you can use any doctor or facility that you like, but your costs will be substantially lower if you choose a provider that is within the network.

Policy: Contract between you and your insurance company that provides specific coverage details for the health plan you selected.

Premium: Amount that you pay for health coverage, usually monthly. If you have health insurance through an employer this is typically deducted from your salary every pay period.
